

Md. Fahim Bin Imam Nahid

Software Engineer

+8801836277166 | fahimbinimam@gmail.com | linkedin.com/in/fahimbinimam | github.com/Nahidworld

Summary

Computer Science undergraduate with experience in Java, Spring Boot, full-stack web development, and machine learning. Completed a Software Engineer Trainee internship at Brain Station 23, contributing to backend systems, fintech microservices, and production issue resolution for banking clients. Skilled in REST API development, database management, debugging, and scalable application design. Passionate about software engineering, problem-solving, and continuously strengthening core development skills.

Experience

Software Engineer Trainee (Java)

Jul 2025 – Oct 2025

Brain Station 23 PLC (On Site)

Dhaka, Bangladesh

- Developed backend services using **Java Spring Boot** and built REST APIs for a Library Management System
- Contributed to fintech microservices for AB Bank and NCC Bank, ensuring secure transaction processing
- Diagnosed and resolved 30+ production issues using Grafana and log analysis, reducing system downtime
- Created RCA reports, improving issue resolution time by approximately 30%
- Collaborated in an **Agile environment** including daily stand-ups, sprint planning and team discussions

Projects

Enhanced Gastrointestinal Disease Classification using Deep Learning

[Kaggle Source Code](#)

Tools and Technologies: Python, TensorFlow, Keras, Transfer Learning

Mar 2025 – May 2026

- Developed an attention-enhanced CNN ensemble for **gastrointestinal disease classification** using endoscopic images
- Achieved **97.00% accuracy** on the Kvasir V2 dataset with balanced evaluation metrics
- Integrated **EfficientNetB3**, **DenseNet121**, and **InceptionV3** with CBAM attention mechanisms
- Applied transfer learning, feature fusion, texture extraction, TTA, and SWA for performance optimization

Bitcoin Price Prediction using Machine Learning

[GitHub Source Code](#)

Tools and Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook

Feb 2025 – May 2025

- Developed a machine learning model for **Bitcoin price prediction** using historical cryptocurrency data
- Performed data preprocessing, visualization, and feature analysis using **Pandas** and **NumPy**
- Applied regression models for price forecasting
- Visualized model performance and market trends using **Matplotlib**

Catering Service Management System

[GitHub Source Code](#)

Tools and Technologies: Next.js, NestJS, PostgreSQL, JavaScript, JWT, GitHub

Jan 2025 – Apr 2025

- Built responsive UI using Next.js for menu management and user roles
- Implemented authentication flow using JWT for secure user experience
- Built REST APIs using **NestJS** for frontend-backend communication

Library Management System

[GitHub Source Code](#)

Tools and Technologies: Java Spring Boot, PostgreSQL, JWT, Git

Jul 2025 – Sep 2025

- Built a backend system managing books, users, borrowing, booking, and reviews
- Designed and implemented **RESTful APIs** with role-based access control
- Integrated **PostgreSQL database** for efficient data handling
- Developed modular services for scalability and maintainability
- Managed version control and collaboration using Git (10+ commits and feature branches)

Skills

Programming Languages: Java, Python, C, C++, C#

Backend: Spring Boot, Node.js, ASP.NET

Frontend: Next.js, Tailwind CSS

Databases: PostgreSQL, MySQL, MSSQL

Machine Learning & AI: Scikit-learn, TensorFlow, Keras

Education

B.Sc. in Computer Science and Engineering <i>American International University Bangladesh</i>	2022 - 2025 <i>CGPA: 3.82 / 4.00</i>
Higher Secondary School Certificate <i>Birshreshtha Munshi Abdur Rouf Public College</i>	2018 - 2019 <i>GPA: 5.00 / 5.00</i>

Awards & Certifications

- **Ranked 17th** out of 500+ participants in **DU AI Challenge: DU Arena Season 1** (University of Dhaka) – Developed a computer vision model for traffic object detection from drone images.
- Received the **Dean’s Award** for academic excellence at AIUB.

Publication

- **Enhanced Gastrointestinal Disease Classification via Transfer Learning on Endoscopic Images** (Under Review)
